

(no subject) –

Children make people
smile in a way that suggests

It is possible

The more familiar the surface the less
fertile the soil Or this wasn't meant

for growing but rubbing uselessly against
like a beast

after a hard day of being less than
its troubles

I am sometimes concerned

when I am gone my family will scatter
my body

just to continue the line by feeding it
to the rivers underneath us

water is a kind of reproduction
because we are carried by it changed

when I am maturing your hair or taking
your fiancé from you at the beach

I will look so hot stupefying colonizers

Useless is its own empire

As it grows it settles
